

## Tools Merge Files

It allows you to combine multiple .fasta files into a single .fasta file.

- ① Select the input folder. It should only contain the .fasta files you want to merge.
- ② Check the 'Merge Files' field.
- ③ Choose the output folder and enter the file name as follows: /NAME.fasta.
- ④ Click Calculate.

A single .fasta file will be generated with all the sequences from the input files.

More information about this function can be found in the User Manual, section:

VI. TOOLS VI.1 FILE EDITING VI.1.A) MERGE FILES
